SUMMARY

Professional guy with 3+ years of experience in Android development who has profound learning, contributing and R&D skills. Creative person who prefers to not inventing the wheel, but in case of performance, memory management, app size and security can and will invent a spherical wheel. A result oriented and passionate developer who enjoys solving problems and creating new features.

EXPERIENCE

Lead Android Developer

at Sheypoor   📅 Jan. 2018 - Present   📍 Tehran, Iran

Sheypoor is one of lead classifieds marketplaces in Iran with over 1.5M users per day.

Missions:
- As the functional manager of Android team, I'm responsible for the code quality of Sheypoor app. I coach the team to practice design patterns, clean code and using app architecture, along with updating libraries and adding new features with focus on agility and UX.
- Beside other features, I like a feature that downloads static data, which includes locations and categories, in the build time and inserting them into a database then using that database as an asset in run time of the app.
- Redesign the entire app, including rebranding, for summer campaign.

Technologies:
- Dagger 2, RxJava 2, Butter Knife, Greendao, etc.
- Agile, Kanban, Git Flow, CI/CD
- Mockito, Espresso, Jacoco
- Pivotal Tracker, Github, Jenkins, Slack, Zeplin, etc.

Senior Android Developer

at Myket   📅 Sep. 2015 - Des. 2017   📍 Tehran, Iran

Myket is one of lead app stores in Iran with over 8+ million users.

Missions:
- Starting TDD and installing Jenking's pipeline to handle CI/CD.
- Implementing features such as handling deeplinks, search page, inbox page, etc.

Technologies:
- Volley, One Signal, EventBus, OrmLite, etc.
- Agile, Scrum, Git Flow
- Mockito, Espresso
- Atlassian Jira, Atlassian Confluence, Gitlab, Jfrog, Jenkins

Java and C# developer

at Soha System   📅 Mar. 2015 - Aug. 2015   📍 Tehran, Iran

SOHA was formed to focus on solutions based on smart cards.

Missions:
- Download a jpeg image from a RFID card and show it in an Android app by using bluetooth connection.
- Impelementing Android and desktop apps.
