Summary

Dedicated software developer with 21+ years of experience, including 11 years in professional Android development. Skilled in software architecture, algorithm design, and machine learning applications.

- Expertise in creating scalable, maintainable, and efficient software
- Strong advocate for SOLID principles, SSOT, pure functions, and stateless design
- Passionate about applying machine learning to improve human life
- Experience teaching algorithms and programming at university level
- Committed to continuous learning and open-source contributions
- Proactive, and transparent, in technical decision-making

Comprehensive mastery of Android ecosystem, from low-level system interactions to high-level app architecture. Eager to collaborate with creative, motivated teams in challenging technical environments.

Experience

Senior Mobile Developer

at [Bell Canada](#)  April, 2026 - Present  Toronto, Canada

Bell Canada is a Canadian telecommunications company

Mission:

- Implemented Trunk Based Development's pipelines in Gitlab for both Android and iOS on multiple repositories, including create release branch, cherry pick into release, publish, and promote artifacts from RC
- Pinned down dependencies
- Fixed security issues reported by Gitlab SAST
- Migrated Gitlab jobs to custom, and task specific, Linux containers to improve efficiency, isolation, reproducibility, etc.
- Improved code verifications on pipelines to achieve frictionless experience for engineers

Technologies:

- Android, Kotlin Multiplatform/KMP, Gitlab's Configurations, Gradle Plugin
- iOS, Swift, XCode

Senior Mobile Developer

at [Block Inc. - Bitkey project\(via Touchlab\)](#)  November, 2025 - Feb, 2026  Toronto, Canada

Block, Inc. is an American technology company and a financial services provider for consumers and merchants. The Bitkey is a project in Block Inc. that I directly work on. Bitkey is a digital wallet for bitcoin, available in the U.S. and 95 other countries.

Mission:

- Worked on multi backup project
- Fixed flaky tests, including unit and functional tests by solving multiple race conditions and state management problems
- Worked on the new onboarding flow

Technologies:

- Kotlin Multiplatform/KMP, Compose Multiplatform/CMP, Gradle Plugin
- iOS, Swift, XCode
- Rust binding, UniFFI
- Ktor, Anvil, SqlDelight, Kotest
- Github, Linear, Notion, BuildKite, etc.

Lead Android Developer

at [CIBC \(via Vision Talent\)](#)  March, 2025 - November 2025  Toronto, Canada

The Canadian Imperial Bank of Commerce is a Canadian multinational banking and financial services corporation headquartered at CIBC Square in the Financial District of Toronto, Ontario.

Mission:

- Rewriting features in the newly developing CIBC mobile apps
- Improved the shared CI pipeline build-time by almost 50%, mostly by using build caches
- Initiated and Implemented memory management by applying structural DI scopes to release resources, ViewModels(in MVVM architecture), and their state
- Working on remote FeatureFlag functionality
- Migrated a Confluence's scraping script to use Selenium

Technologies:

- Kotlin Multiplatform/KMP, Android, Compose Multiplatform/CMP, Gradle Plugin, code generator
- iOS, Swift, XCode, SwiftUI
- Ktor, Koin, Compose Navigation, etc.
- Atlassian Jira, Atlassian Confluence, Github, Jenkins, etc.

Software Engineer -> Productivity Engineer

at [Bell Canada \(via MobileLIVE\)](#)  Aug, 2022 - Nov, 2024  Toronto, Canada

Promoted to Productivity Engineer.

Mission:

- Resolved VPN network proxy and self-signed certificate issues by developing an automated installation script and Compose Multiplatform app, resulting in a 164% increase in build count on the Gradle Enterprise(Develocity) dashboard.
- Initiated and implemented Gradle Conventional Plugins to reduce code duplication and errors. Established Single Source of Truth (SSOT) for external library versions, significantly reducing runtime crashes caused by version conflicts.
- Spearheaded the adoption of Merge Trains and Merge Request Pipelines in GitLab, creating a Proof of Concept (POC) workflow that demonstrably improved code quality and streamlined the integration process.
- Optimized test execution, reducing incremental runtime by 52% and improving overall development efficiency.
- Served as the primary resource for build-related training and support across a team of 50+ Android developers, enhancing team productivity and knowledge sharing.
- Implemented a custom No-Framework dependency injection solution across multiple app and library repositories, enhancing modularity, testability, and maintainability while minimizing build times by avoiding code generation.
- Integrated Detekt to verify code quality in the merge request's pipelines.

Additional Technologies:

- Develocity(Gradle Enterprise), Gradle Conventional Plugin, Detekt
- Kotlin Multiplatform, Compose Multiplatform

Software Engineer

at [Bell Canada \(via MobileLIVE\)](#)  Apr. 2021 - Aug. 2022  Toronto, Canada

MobileLIVE: A Canadian tech-service provider specializing in digital transformation solutions. Bell Canada: Canada's largest telecommunications company, offering mobile services (Bell Mobility, Virgin Mobile), television (Bell Satellite TV, Bell Fibe TV), and internet services across the country.

Mission:

- Implemented a Request for Comments (RFC) process for technical decision-making, streamlining the evaluation and adoption of new ideas across the organization.
- Led regular knowledge-sharing discussions across the team on SOLID principles, modularization best practices, feature flag implementation, and monorepo architecture, elevating the team's overall code quality and architectural design skills.
- Conceived and executed an automated system for cloning and building source code across a multi-repo setup, significantly reducing version conflicts and enhancing code visibility for efficient debugging.

Technologies:

- Kotlin Coroutines / Mockk, Mockito, JUnit, etc.
- Agile, Sprint, Lane based branching strategy, CI/CD
- Atlassian Jira, Atlassian Confluence, Gitlab, Jenkins, Slack, Branch.io, inVision, Dynatrace, etc.

Staff Android Developer

at [iFood \(via Letgo\)](#)  Oct. 2020 - Mar. 2021  Barcelona, Spain

iFood is a leading food delivery platform, dominating markets in Brazil, Colombia, and Mexico. It's the market leader in Latin America with 50+ million Android app installations. Mission-critical achievement: Initiated and executed a strategy to refactor legacy code out of the root module, resulting in a 55% decrease in incremental build time and improved overall system architecture.

Senior Android Developer

at [Letgo: Leading Classified Marketplace](#)  Oct. 2019 - Mar. 2021  Barcelona, Spain

One of the largest classified marketplaces in the United States at the time. Market leader in Turkey with 15+ million Android app installations. Mission-critical achievement: Optimized feed loading performance, reducing launch time by over 60 seconds.

Lead Android Developer

at [Sheypoor: Top-Tier Classified Marketplace](#)  Jan. 2018 - Jan. 2019  Tehran, Iran

Impressive user base: 13+ million overall users, 1.5+ million daily active users. High engagement: 344+ million sessions. Key Achievement: Spearheaded initiatives that tripled daily active users from 500,000 to 1.5+ million within one year.

Senior Android Developer

at [Myket: Top-Tier App Store and Social Network](#)  Sep. 2015 - Des. 2017  Tehran, Iran

Java and C# developer

at [Soha System](#)  Mar. 2015 - Aug. 2015  Tehran, Iran

Public Contributions

-  2024 Post: Matrix Fast Fourier transform(MFFT) - An optimization for Matrix Multiplication
-  2024 C Numbers: This is a collection of number types, including floating numbers and p-adic numbers.
-  2024 Post: Not All codes are liabilities
-  2024 City of Toronto RAG GPT: The project received the second position award in the TMLS Hackathon.
-  2024 dragon detector: A simple ML model to detect dragon in images
-  2024 Nix Effect pod: Modularize effects of all kinds, and stay in-control, with NixOS and podman.
-  2023 Contributing to nixpkgs/androidenv: Nix is a language that is designed to have reproducible output.
-  2021 iFood Engineering post: Modularization tip: optimize the Root Module.
-  2021 ProAndroidDev post: Happy Railway. An improvement for Railway Oriented Programming in Kotlin.
-  2021 Library: Happy is a library to auto-generate Kotlin code to make calling APIs more concise.
-  2020 POC: Rust Flutter Reactive is an idea to use Flutter as UI and Rust for the main project.
-  2020 Make Log4k Multiplatform: Simple logging library for Android, iOS, Mac, etc.
-  2020 ProAndroidDev post: A/B Testing Myths
-  2020 Contributing on Arrow Library: Arrow is a library for Typed Functional Programming in Kotlin
-  2020 Library: A Kotlin compiler plugin that generates trackable method
-  2018 ProAndroidDev post: Logging in Kotlin
-  2018 Log4k Library: Easy logging library, but unfortunately it's in Sheypoor repository
-  2018 ProAndroidDev post: Reactive MVVM architectural pattern

Education

Sharif University Of Technology	M.Sc	in Physics	 Feb. 2010	 Tehran, Iran
Payame Noor University	B.Sc	in Physics	 Jul. 2007	 Mashhad, Iran

Tools / Skills

Kotlin Multiplatform/KMP

Compose Multiplatform/Android/iOS/Desktop
Advocate for independent UI/UX from platform
Main Contributor of Log4K
Main Contributor of LifecycleHandler

Android

MVVM/Android Architecture Components/JetPack
Anvil/Dagger 2/RxJava 2/Retrofit 2/...
Kotlin Multiplatform/Kotlin Coroutines
custom Kotlin Compiler Plugins/...
custom KSP plugins/...
Jetpack Compose/View Binding/...
Contributor of NixOS's Android Env

iOS

Swift/SwiftUI

Software Architecture

Clean Architecture/Hexagonal Architecture
Unidirectional data flow Architecture
Stateless Architecture
Logic Tree Architecture
MVVM/MVI/MVP/RMVVM

Principle

Clean Code/SOLID
Object Oriented Programming
Functional Programming
Isolation/Reproducibility
Stable Dependencies Principle
Stable Abstractions Principle

Design Pattern

Factory/Builder/Singleton/...
Adapter/Facade/Proxy/Visitor/Delegate/...
Strategy/Chain of responsibility/...

Modularization Strategies

Applying DIP/Decrease incremental build time
Code isolation to reduce dependencies

Continuous Integration/Deployment

Jenkins, GitLab CI, Fastlane

Android Performance Optimization

memory management/threading/profiling tools

Android Security

encryption/secure networking/permissions model

Android Test and Verification

Unit/Integration/Mockito/Espresso/JaCoCo/...
Detekt plugins/Konsist

Android Build System

ProGuard/R8/custom Gradle plugins

Build Tool

Nix/Gradle/Cargo/Sbt/Maven/Ant/Make/...

Command Line Tool

tmux/bash/zsh/git/grep/sed/netstat/awk/podman/...
adb/sdkmanager/avdmanager/xcodebuild/...

Rust

actix/rusqlite/tokio/thiserror/crossbeam
tonic/prost/openssl/flatbuffers/thrift
Rc/Arc/Mutex
FFI

Groovy/Dart/JavaScript/Ruby...

Workflow

Trunk Based development/Github flow/Git Flow
Cross-functional team

Operating System

Linux(NixOS/Fedora/Ubuntu/Debian), MacOS

Achievements and Recognition

- 2026 Had an offer from Bell Canada
- 2025 Had an offer from Block Inc. via Touchlab
- 2025 Had an offer from CIBC via Vision Talent
- 2024 Had an offer from Accenture via Experis
- 2024 First position in National Health Datathon
- 2024 Second position in AWS Summit's Gameday
- 2024 Second position in Toronto Machine Learning #TMLS Hackathon
- 2020 Had an offer from MobileLIVE, Toronto, Canada
- 2020 Had an offer from iFood, Remote
- 2019 Had an offer from Kik, Kitchener, Canada
- 2019 Had an offer from Letgo, Barcelona, Spain
- 2019 Had an offer from CRITICAL Techworks, BMW, Porto, Portugal
- 2019 Had an offer from The Next Big Thing, Berlin, Germany
- 2018 Received result-oriented badge in Sheypoor
- 2007 Ranked 44th among more than five thousand participants in the National Graduate Entrance Exam in Physics

Language

English: Advance
Farsi: Native
